

TECHNICAL DATASHEET

Polyurethane Foam Cleaner

Description & Uses

The ideal choice for the easy and quick removal of fresh, uncured PU foam from applicator guns and nozzles. Can also be used to clean foam from surfaces, window and door frames and clothes.

Directions

To clean foam applicator guns simply screw the can tightly onto the foam applicator gun, taking care not to over tighten and spray through the gun. If a tin of expanding foam has been left attached to the gun for longer than 1 week the gun should be cleaned thoroughly inside and out to remove all residues.

For cleaning of applicator nozzles, spray through the nozzle.

Storage

Store in cool, dry conditions, away from direct sunlight. Ideally store between +5°C & +25°C.

Shelf Life

24 months when stored in original, unopened packaging.

Limitations

Can not be used to clean cured foam.

Strong solvent - may damage sensitive surface – always test a small inconspicuous area before full scale application.

It is the user's responsibility to ensure suitability for use.

Read the label prior to use for essential health and safety information, further information can be found in the Safety Data sheet available on request.

Technical Data

Basis	Solvent mixture
Consistency	Liquid
Appearance	Clear
Specific Gravity	0.85g/cm ³
